

災害時の方言とコミュニケーション
ー日本語教育と方言研究の連携のためにー

竹田晃子

災害時には、平時の課題が緊急課題として表面化する。本論は、災害時のコミュニケーションに留意しながら、共通語形式と比較する形で方言形式を整理し、共通語を学びつつある日本語学習者（非母語話者）にわかりにくいと思われる具体例を紹介する。また、近年の方言研究の動向を整理し、日本語教育との関係を位置づけることで、学問分野間での連携の可能性を示す。

**Regional Dialects and Communication in Times of Disaster: Towards Cooperation
between Dialect Studies and Teaching Japanese as a Foreign Language**

TAKEDA Kōko

When disasters happen, problems that exist in ordinary times can suddenly become more acute. This study focuses on communication in times of disaster, and clarifies issues raised by regional dialects in comparison with Standard Japanese. It introduces some concrete examples of dialect speech that are difficult to understand for non-native speakers who are learning Standard Japanese. It further examines recent trends in dialect research and how they relate to Teaching Japanese as a Foreign Language, and suggests possibilities for cooperation between these fields.
